# 1. CAPTURE LEARNING/ ASSETS WHERE THEY ARE

Apr 14 - 18

Life

If you're looking for your ideal future, you're going to be doing some online research. Did you know that more than half of all Internet searches fail? That's because most people don't know some basic tricks to finding what you want the first time on Google, Bing, or other search engines. Do you consider yourself an expert at Internet searching?

- Check out the [Tips to Effective Internet Searching](#) and find at least one search tip that you didn't know.
- Perform a search three times, each time using a different tip mentioned in the article. Which tip produced the best results? Tell us about it in a text comment.
- If you don't already have one, create an email account at a free online email service like Gmail, Yahoo, or Hotmail. This will be your "professional" email account, so avoid names that you wouldn't want a professional contact to see!
